
DiaMension™ HD

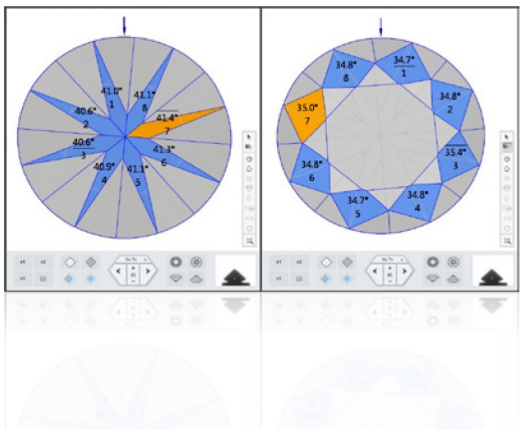
Recut High Definition Accuracy

DiaMension™ HD provides accurate geometrical measurements of polished and semi-polished diamonds. Integrated with the Instructor™ software, the DiaMension™ HD provides comprehensive Cut and Symmetry grade information, leaving no facet behind.

DiaMension™ HD supports most diamond shapes and sizes, allowing diamond cutters, wholesalers and gemologists to quickly and confidently evaluate the proportions and symmetry of the stone. The DiaMension™ HD is used by major gem labs worldwide.

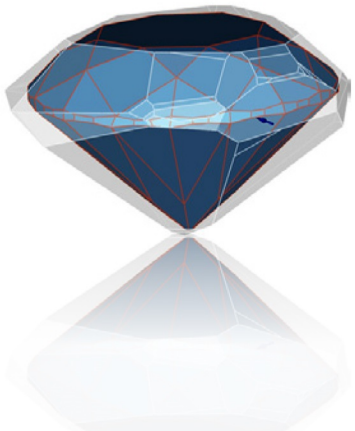
- Superior accuracy
- Fast measurement
- Supports scanning of fully polished and semi-polished diamonds

Cut and Symmetry Measurement



- Provides Cut and Symmetry grades of the different labs standards including: GIA®, AGS®, IGI®, HRD®, EGL®, AGL and others
- Comprehensive information, including all facets and measurements of the diamond
- Supports most diamond shapes, including custom made shapes
- Used in leading labs worldwide

Potential Recut



- Virtual Recut solution to reveal optimal diamond Recut potential
- Based on advanced algorithms examining millions of alternatives
- Proven tool to increase yield and maximize value
- Fully automated and asymmetrical Recut suggestions

DiaMension™ HD Device

- Superior accuracy using high resolution digital camera with an advanced opto-mechanical system
- Fast measurement assuring high efficiency
- Supports a wide range of diamond sizes and shapes
- Supports polished diamonds as well as semi-polished ones

LeoBlu is the official Representative & service provider of Sarine Technologies for :
Thailand-Singapore-Vietnam-Indonesia-Malaysia-Cambodia-Laos-Myanmar-Philippines-Dubai & Arab world
LEOBLU LTD. 213/3 Soi Sainamthip2, Sukhumvit22, Klong-Toei, Bangkok 10110 Thailand.
