

## Galaxy™

Maximize  
Value

Inclusion  
Mapping

Planning  
Integration

Galaxy™ systems scan and map inclusions in rough diamonds, offering automated internal assessment and detecting the most minute clarity data for a wide range of stone sizes. The Galaxy™ is interoperable with Sarine's powerful Advisor™ rough planning software, enabling computer-assisted diamond planning based on 3D clarity data. Our solution optimizes the production process and maximizes polished diamond output, while reducing the manufacturing cycle time and avoiding human error. Galaxy™ scanning services are available to diamantaires at service centers around the globe, for diamond sizes of up to 200 ct.

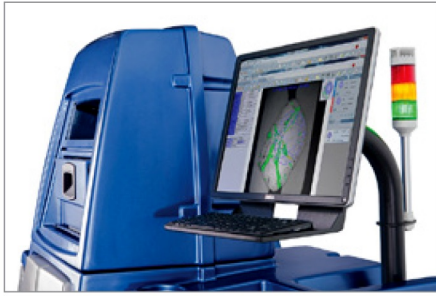

- The Galaxy™ has revolutionized rough diamond planning
- Detects inclusions up to VVS
- Eliminates the need to open windows
- Interoperable with Advisor™

Galatea 4C

## Galaxy™ 1000

- Detects inclusions up to VS for diamonds measuring between 4mm to 12mm (~ 0.30ct. - ~ 20ct.)
- Interoperable with Advisor™ software
- Reduces manufacturing cycle time
- Prevents human error

## Galaxy™ Ultra

- Equipped with a powerful microscope, Galaxy™ ULTRA provides inclusion detection and modeling up to VVS
- User can alternate between conventional and high-resolution microscopic operation modes
- Substitutes manual microscopic inspection during planning, enabling the user to identify and distinguish between different impurity types

## Solaris™ 100

- High throughput inclusion scanning solution for diamonds measuring between 3.5mm to 9mm (~ 0.30ct. - ~ 2.50 ct)
- Detects inclusions up to VS
- Supports efficient large-scale planning and manufacturing operations

LeoBlu is the official Representative & service provider of Sarine Technologies for : Thailand-Singapore-Vietnam-Indonesia-Malaysia-Cambodia-Laos-Myanmar-Philippines-Dubai & Arab world
