Charting

Rough  
Planning

Recut

The DiaExpert™ Eye is an advanced version of DiaExpert™ rough diamond planning system, adding the ability to view the interior of a rough diamond using a high resolution optical inspection camera to chart the rough stone's primary inclusions with extremely high precision. The DiaExpert™ Eye enables to manually add the internal inclusions to the Advisor's™ planning solution.

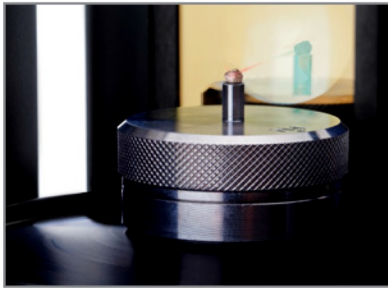

- Advanced inclusion charting capabilities with bright illumination and enhanced resolution
- View black, white and all ranges of grayscale, as well as transparent and opaque inclusions up to VS1 size
- Utilize inclusion data to provide an additional dimension of Clarity grade to your planning solution

## Inclusion Charting

- An add-on software package to the Advisor™ rough planning software
- High accuracy of inclusion charting
- Automatically calculates exact inclusion location, size and shape
- Supports parallel processing using offline inexpensive inclusion charting stations, increasing productivity

## DiaMark™ Eye System

- Combining the DiaMark™ Z with the DiaExpert™ Eye and Advisor™ rough planning software establishes an optimal rough planning solution
- Accurate vivid black marking enables straightforward sawing, shaping, bruting and polishing, reducing human error
- Extremely fast laser marking, using a proprietary low-power laser, eliminating risk to the diamond or user while providing greater throughput

## DiaExpert™ Eye Device

- Modular system allows you to easily upgrade the system by adding marking capabilities and/or adding lenses that support additional stone size ranges
- DiaExpert™ Eye is available in two configurations:
  1. Multi-Lens - supports all stone sizes from 1 point to 100 ct.
  2. Single Lens - cost effective solution which is limited to specific size/weight ranges
