

## DiaScan™ S+

Cut Grading Proportions Portability

The DiaScan™ S+ is a compact and mobile system for measuring and grading polished and semi-polished diamonds, and may also be used as a rough diamond planning solution. The system is available in various models, each measuring a different size range of diamonds. The DiaScan S+ is an accurate, yet cost effective system.

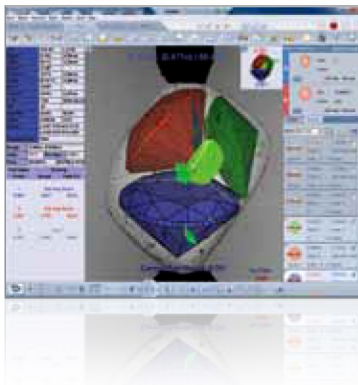

- Supports scanning of fully polished and semi-polished diamonds
- Configurable to customer specifications
- A compact and easy for travel diamond scanner
- Operates with Sarine's Rough & Polish software: Instructor™, Advisor™ and DiaVision™

## Polished Diamonds Measurement & Grading

- Full analysis and extensive Cut grading information
- Supports most shapes and sizes
- Accurate geometrical measurements for polished and semi polished diamonds using Instructor™ software
- Supports the leading gem labs' Cut grading standards

## Rough Diamonds Measurement & Planning

- Accurate mapping of rough diamonds using Advisor™ software
- Optional Laser Mapping component to accurately measure diamond concave areas
- Advanced planning options based on manufacturer's preferences

## DiaScan S+ Device

- Compact, lightweight device (only 1.7 kg)
- Mobile device with a sturdy carrying case
- Connects to desktops or laptops using a single USB connection
- Configurable to customer specifications
